CORSO'S FLOWER MARKET

Assisted "Do It Yourself" Party Planning

We are pleased to introduce Corso's Flower Market, an assisted "Do It Yourself" service. While we are aware that anyone can purchase cut flowers online, we are experts in the special care and handling that fresh flowers require. This is how our new program works and what it means to you!

1. Make an appointment with one of our designers to discuss your ideas. You will be welcomed into our walk-in cooler to view a variety of fresh flowers and to determine seasonal availability and other choices.
2. Determine where you want to place flowers. For example: guest tables, buffet table, ceremony, etc. Also, determine flowers needed for bouquets in the event of wedding planning.
3. Next, our staff will translate your dreams into a tangible order including the precise number of stems needed, foliage that will be used with the flowers and hard goods such as oasis, vases, or ribbon.
4. Our professional staff will place an order from the best-suited supplier. We will specify the correct delivery date to our facility and begin the hydrating process. At the perfect cut point, your flowers will be placed in our cooler to be held for you until the pre-determined pick up or delivery date.
5. Our new flower market service eliminates the worry of bad quality flowers ordered online. It also eliminates the worry of late or lost deliveries. The flowers will always be hydrated and cooled at the proper time. For ease of transportation and use, we leave the flowers in buckets for you to return at your convenience.
6. Another advantage is having us create the designs you aren't comfortable doing, such as larger ceremony arrangements or more intricate items such as corsages.
7. It's the best of both worlds... you do the "fun part" with the partnership of Corso's staff years of experience! Flowers must be purchased in wholesale units so we can offer you the best price available.
8. Call for more information and start dreaming!
